- SIDEWINDER

Sidewinders get their name from their unique form of side-stepping locomotion that is an adaptation for moving across loosely packed desert sands. They are a type of rattlesnake and are venomous.

USED LOGO COLOURS

From all the above, we have chosen this logo because we have done our final logo, we chosen that the snake, Sidewinder will represent us. Through all the logos, the development from car, wing to a snake, was because a simple logo would have been better. The snake with a red body and white eyes with a black outline looks the most aggressive, powerful and strong logo that would represent our team. the way the snake is shown also looks swift and rapid.
